

Net wrap **R&NYOU**

**it looks brown
but it's green**

RNY Technology

► Medium-sized mesh

Synthesis of Novatex experience, RNY Tech also adopts the original distribution of the chains at an increased distance, with reinforced and thicker threads.

► Thicker & Stronger chains

Novatex RNY mesh is made of stronger and thicker threads, ensuring higher strength and more ability to withstand repetitive handling.

► Better cling on the crops

The RNY Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the RNY net wraps hook up fast and easily.

► Mesh with fewer knots

Knots are the critical points of any thread. Novatex RNY net wraps have half the number of knots with respect to standard net wraps.

► Recycled Components

With the use of quality-controlled recycled components, RNY Tech offers very high performance in the field and takes a big step towards environmental protection.

With the reduction up to 12% of the plastic material used, RNY Tech allows a reduction of CO2 up to 30 kg per roll.

The first bale net with recycled components coming from industrial waste, able to guarantee homogeneous and constant quality over time.

Another innovative solution by Novatex for operators focused on reducing the impact of agricultural activities.

The first net wrap with recycled components.
