ML

**Colourful and
super resistant**

Rekord ML

ML Exclusive Technology

► **Large sized mesh**
Thanks to the flexibility of Novatex looms, ML is a solution that envisages a reduced number of chains, each of which is reinforced by double the number of threads.

► **Stronger chains**
ML chains are made with double thicker threads: this is the secret of the strongest netwrap in the market!

► **Better cling on the crops**
The weft has a larger angle than conventional net wraps. For this reason, ML hooks up incredibly faster.

► **Mesh with fewer knots**
Knots are the critical points of any thread. Novatex ML netwraps have half the number of knots with respect to standard netwraps.

► **Flexible geometry**
The reduced number of tension points (knots) aids the natural movement of the weft, leaving it free to stretch in width.

REKORD ML

Rekord®ML is an exclusive net wrap. Its original design, with 25 reinforced chain threads positioned at a greater distance than traditional products, made this balenet the first heavy-duty tool for the harshest condition of work. Rekord ML now features a bright tricolour livery to make your work even more exclusive and recognizable.

Look at the advantages: better cling on forage or straw, better compression of the bales and safer handling, thanks to the highest strength on the market!

Highly visible thanks to its brilliant tricolour livery
