unique

## ME+ Exclusive Technology

### ► Medium-sized mesh

ME+ is a performing solution that allows to produce net wraps made of a reduced number of chains with reinforced and thicker threads.

### ► Higher Specific Strength

ME+ technology gives the threads an incredibly superior Specific Strength. This means: perfect protection of the forage over time.

### ► Better cling on the crops

ME+ Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the ME+ net wraps hook up fast and easily.

### ► Mesh with fewer knots

Knots are the critical points of any thread. Novatex ME+ net wraps have half the number of knots with respect to standard net wraps.

### ► Eco Friendly

The proven increase in strength of Novatex ME+ nets allowed a significant reduction in the use of plastic while maintaining the highest standards available.

Lightweight, resistant and totally well-suited for the perfect execution of the job. Unirec perfectly wraps the bale with its characteristic two-stripes colouring. Unirec is actually lighter. Thanks to the ME+ Technology, Unirec is made up of highly efficient chain threads: more resistant and thinner. This feature has allowed Novatex to produce rolls with more meters while maintaining their small diameter and weight. Great benefits for users: longer baling sessions without replacing the roll frequently and fewer efforts when loading the baler. Who says perfection is impossible?

Perfection is possible

Width: 123 | Length: 2000 m - 3000 m

Roll length	2000 m	3000 m
Roll width	123 cm	123 cm
Max. roll diameter	20 cm	23,5 cm
Mesh type		*ME+
