

Net wrap **R&NYOU**

**it looks brown
but it's green**

RNY Technology

REDUCE

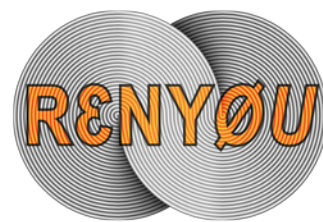

Reduction of plastic in production: less plastic per product, fewer grams per meter.

REUSE

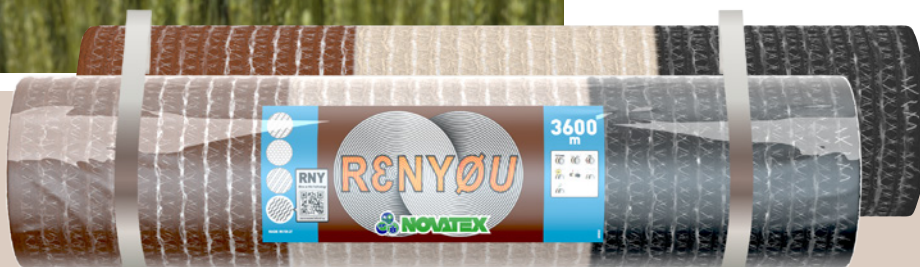

Reuse of secondary plastic materials in extrusion: less plastic in the environment, better quality standards.

RECYCLE

Set in motion a virtuous circle without loss of performance for net wraps: high resistance, lower environmental impact.

The first bale net with recycled components coming from industrial waste, able to guarantee homogeneous and constant quality over time. Another innovative solution by Novatex for operators focused on reducing the impact of agricultural activities.

**R&NYou, the first
Novatex net wrap
with recycled
components**

Roll length	3600 m
Roll width	123 cm
Max. roll diameter	27 cm
Average Strength	270 kg
Mesh type	*RNY
