

Net Wrap UNIREC

**a historic brand
able to renew itself**

ME+ Tecnologia Esclusiva

► Eco Friendly

The proven increase in strength of Novatex ME+ nets allowed a significant reduction in the use of plastic while maintaining the highest standards available.

► Higher Specific Strength

Novatex's ME+ technology gives the threads an incredibly superior Specific Strength. This means: perfect protection of the forage over time.

► Better cling on the crops

The ME+ Tech ensures optimal cling on the crops. Thanks to the wider angle of the weft, the ME net wraps hook up fast and easily.

► Mesh with fewer knots

Knots are the critical points of any thread. Novatex ME+ net wraps have half the number of knots with respect to standard net wraps.

► Medium-sized mesh

ME+ is a performing solution that allows producing net wraps made of a reduced number of chains with reinforced and thicker threads.

UNIREC

Lightweight, resistant and totally well-suited for the perfect execution of the job. Unirec perfectly wraps the bale with its characteristic two-stripes asymmetrical colouring. Unirec is actually lighter. Thanks to the ME+ Technology, Unirec is made up of highly efficient chains: more resistant and thinner. This feature has allowed Novatex to produce rolls with a larger number of meters while maintaining their small diameter and weight. Great benefits for users: longer baling sessions without replacing the roll frequently and fewer efforts when loading the baler. Who says perfection is impossible?

Starnet,
a truly universal
net wrap.
